

READY-TO-USE SETUP GUIDE CONTENT

AI Resume Analyzer SaaS Workflow Setup Guide

Overview

This project is a complete AI-powered Resume Analyzer SaaS system built using:

- Lovable AI
- n8n
- Railway
- Supabase
- Razorpay
- OpenAI API
- PDFShift

The system allows users to:

- Upload resumes
- Paste Unstop job/internship links
- Get ATS analysis
- Receive AI-generated resume improvements
- Download PDF reports
- Access Pro subscriptions

STEP 1 — Create Required Accounts

Create accounts on:

1. OpenAI

<https://platform.openai.com/>

2. Supabase

<https://supabase.com/>

3. Railway

<https://railway.app/>

4. PDFShift

<https://pdfshift.io/>

5. Razorpay (Optional)

<https://razorpay.com/>

6. Lovable

<https://lovable.dev/>

STEP 2 — Deploy n8n on Railway

1. Login to Railway

2. Create New Project

3. Deploy n8n template

4. Wait for deployment

5. Open deployed n8n instance

Enable:

- Public production URL
- Persistent storage

STEP 3 — Import Workflow

1. Open n8n

2. Click “Import Workflow”

3. Upload:
 workflow.json

4. Save workflow

STEP 4 — Configure API Credentials

Inside n8n:

Add:

- OpenAI API key
- PDFShift API key
- Supabase credentials
- Razorpay credentials (optional)

Never expose secret keys publicly.

STEP 5 — Configure Webhooks

1. Copy Production Webhook URL
2. Connect webhook to frontend
3. Ensure workflow is ACTIVE

Recommended:

- Use Production URL only
- Avoid Test URLs in production

STEP 6 — Configure Supabase

Create:

- Authentication system
- User tables
- Usage tracking tables
- Subscription tracking

Enable:

- Email authentication
-

STEP 7 — Configure Razorpay (Optional)

1. Create Razorpay account
2. Generate Live API keys
3. Add keys to frontend/backend
4. Configure Pro subscription plan

Recommended:

- Keep pricing affordable for students
-

STEP 8 — Configure Frontend in Lovable

Frontend includes:

- Landing page
- Authentication
- Dashboard
- Resume upload
- Job URL input
- Payment flow
- PDF downloads

Recommended:

- Connect frontend only to Production Webhook URL
 - Remove editable webhook settings from public UI
-

STEP 9 — Activate Workflow

Inside n8n:

1. Save workflow
 2. Turn workflow ON
 3. Test using:
 - Resume PDF
 - Unstop job link
-

STEP 10 — Deployment Testing

Verify:

- Login works
 - Resume upload works
 - Analysis works
 - PDF generation works
 - Razorpay payments work
 - Usage limits work
-

Current Platform Support

Best optimized for:

- Unstop job/internship links

LinkedIn and Naukri support may require additional parsing logic.

Included Features

- ATS Score Analysis
 - Skills Match Percentage
 - Resume Improvements
 - AI Recommendations
 - PDF Report Generation
 - Subscription System
 - Usage Limits
 - AI Resume Optimization
-

Recommended Tech Stack

Frontend:

- Lovable

Backend:

- n8n

Hosting:

- Railway

Database:

- Supabase

Payments:

- Razorpay

AI:

- OpenAI API

PDF:

- PDFShift

Important Notes

- API costs are NOT included.
- Buyers must manage their own API billing.
- Do not expose secret keys publicly.
- Recommended for educational and SaaS starter projects.

Support

This workflow is intended as:

- a SaaS starter kit
- AI automation learning project
- resume analysis system template

Additional customization may be required depending on use case.
